

OBJECTIVE:

At the end of the workshop the participants will have the tools for the construction, use and maintenance of ecotechnologies. The course is aimed at people who want to develop ecotechnologies in their habitat for the care and improvement of the environment.

MODULES:

1. What they are and what is the role of ecotechnologies
2. Ferrocement tanks
3. Energy saving stoves
4. Ecological toilets
5. Water filters

MODALITY:

- The course is in person and lasts 10 days, 7 hours per day.
- It is possible to provide the modules that the organization requires. This course includes theoretical teaching and if the participant needs accompaniment in the development of ecotechnology, it is provided at no extra cost.

NUMBER OF PARTICIPANTS:

Minimum 10 / Maximum 20

COSTS:

- Full course: \$ 12,000.00 per participant
- Per module \$ 3,000.00 per participant

The cost of the course includes:

- Lodging and food for ten days
- Manual for each participant

These prices do not include IVA. In the case of only one module, the price only includes food.
